

Paper Angel

By Veronica Anglesea

Materials Required:

3mm Gold edged White quilling paper.

3mm Gold quilling paper.

18 Prong metal onion holder.

P.V.A. Craft Adhesive.

Card mount: AP08G Dark Blue/Gold.

To Make The Card:

Use gold paper for the halo and gold edged white for everything else. The diagram below shows the onion holder and the prong numbers.

To begin each piece, wind the paper round the bottom prong and bring it up the side of the holder nearest to you (the side nearest to you is the wrong side except when working the cape).

Wind forward over the prong number given in the chart below for the piece you are making, go down the front of the holder, round the bottom prong and back up to the prong below the one you last used. As you work, overlap each loop at the bottom and glue the strip to the previous fold on the wrong side at the overlap, this will hold the loops in position when you remove them from the onion holder.

Work down the onion holder using each prong until you have the specified number of

Skirt	750mm	Prong 15	8 Loops
Wing	600mm	Prong 12	10 Loops
Sleeve	300mm	Prong 7	6 Loops
Cape	350mm	Prong 10	6 Loops

loops for the piece you are making. You will need to join the quilling paper to make some of the components as it is not long enough, always join on the wrong side so that the join does not show.

The chart gives the length of paper you will need for each piece, the prong number to begin folding on and how many loops to fold, use this to make the looped pieces following the method outlined.

Using a 75mm length of paper make a loose coil, pinch one end to make the hand. Make the head from 150 mm of paper, glue the coils towards one side so they form an eccentric circle.

Make the halo from 150 mm of gold paper rolled tightly around your little finger or a pencil, glue the end and squash slightly to shape.

Position all the pieces onto the card, place the wings pointing towards the top left and the skirt pointing towards the lower left corner of the aperture and glue into place.
